

## YWAMKnowledgeBase: Communications Database

**In light of the increasing** growth within the area of communications we have identified a need for a comprehensive global database, that lists existing and new YWAM communication ministries. Recognising that the GO MANUAL and the UofN Catalogue offer information concerning operating locations and training programmes, we would like to gather the necessary information that provides a platform to promote and recruit people for these ministries, this in turn would allow information, human and material resources to be shared.

**For this reason** we would ask you to fill out the following form.
